BUSINESS

The Art of Software
New shows monthly

March 15th 2018: Tools and Technology: Where to start depends on where you want to go

In this weeks' episode we will explore the vast breadth of tools that are available to software professionals today – those that improve the quality, capability, and reach – and those to avoid. We will review the types of choices available at each of the software layers and help identify the ones you may need for your next development project; from web and mobile user interfaces to system services and databases, compilers and runtimes, as well as environments, architectures, frameworks and libraries.
