April 10th 2018: Fusion and Coffee

[Tune in](#)

Archives Available on
VoiceAmerica Variety Channel

Physics and coffee often go hand in hand. Physicists tend to demonstrate physics principles through a cup of coffee or require a cup of coffee to get them fueled for their experiments. There is a close relationship between coffee and physics, and we'll be exploring this relationship with our very special guest and physicist, Daniel Refy in Hungary. We'll share fun physics stories and we'll talk about how coffee plays a role. We'll also learn about some of the interesting research projects being conducted at Wigner Fusion.
