July 2nd 2018: FOOD PRODUCTION: THE **UNTOLD IMPACT ON CLIMATE CHANGE**

Do you know what the major contributors to climate change are? Do you think its pollution from cars, trains and airplanes? Nope. Guess again. It is food production and agricultural practices. Find out how removing one food from your diet weekly can save more C02 gases than driving a Prius for a year! Discover which foods that you eat every day contribute most to climate change and simple ways to reduce your carbon footprint. Learn about easy and affordable options to stop creating more waste and conserve our natural resources for future generations to enjoy. Teach your family and friends
