It's interesting to learn about stem cell research and all the amazing things happening in this area. Scientists often find themselves in the lab and at meetings where coffee keeps them fueled. We're sharing favorite coffee stories with noted stem cell researcher, Dr. Suzanne Peterson. We are delighted to have Dr. Peterson talk about all the exciting progress happening in this area...and how coffee might play a role. We could say, that a lot 'stems' from coffee in the field of science. We'll find out more from Dr. Peterson as we hear about what's hot in biology.
