**August 14th 2018: AI: Designing the Future of Humanity - Part 2**

The buzz: “It’s going to be interesting to see how society deals with artificial intelligence, but it will definitely be cool” (Colin Angle). When humans and computers work together, they can do amazing things neither can do alone. Most design jobs today require empathy, problem framing, creative problem solving, negotiation, and persuasion. With a boost from AI, non-designers can develop these skills and in the future, everyone will be a designer. The experts speak. Frank Diana, TCS: “The country needs and, unless I mistake its temper, the country demands, bold, persistent experimentation” (Fr

### Featured Guests

#### Frank Diana

Frank Diana is a Managing Partner and Futurist at Tata Consultancy Services, as well as a thought leader and frequent speaker. He has served in various C-Level roles throughout his career and has over 35 years of leadership experience. Currently at TCS, he is focused on a future shaped by changes in the societal, geopolitical, and economic landscape, and the associated implications for business. He blends a futurist perspective with a pragmatic, actionable approach gained through years of dealing with the practical realities of business. He scans multiple horizons with a strong ability to connect dots and identify future scenarios quickly and broadly.
