BUSINESS

Data Security and Privacy with the Privacy Professor
New shows the first Saturday of each month at 8 AM Pacific
January 15th 2019: Data Security and Privacy Ethics in Computing

There have been concerns about the ethical use of technology, data, and the results of processing for many decades. We are now dealing with additional emerging ethical issues involving big data analytics, artificial intelligence and the associated biases, the use of personal data found online that is not protected, and also for data that is generated by and transmitted through smart devices, and so many other situations. Are there generational differences in computing ethics? How do computing ethics impact data security and privacy? What are the security and privacy ethical concerns for big data
