One of the challenges we confront in society is the production of energy or power. After two major hurricanes that hit the Caribbean and United States in 2017 a resurgence of alternative or micro grids power has begun. Power lost after natural disaster or emergencies is an item of interest. In fact, after a year, very small pockets in rural areas in the Caribbean islands are still without power. How can this power problem be solved? What can inventors and engineers propose to help solve this power lost? To help discuss this subject, I have asked Mr. Richard Haase and Dr. Juan Ruiz b
