# Coffee Break with Game-Changers

with your host Bonnie D. Graham

Designing A Game-Changing User Experience, Presented by SAP Tuesday at 7 AM Pacific /10 AM Eastern October 1st 2019: Can Neuroscience Improve Your Experience of Learning?

The buzz: "There is no doubt that as learners we express our preferences for the type of learning we like to engage in, but until the research tells us differently, we should at least consider designing for the brain and not the learning style. But the brain is so intricate...where do we start?" (Jon Kennard). A fascinating area of neuroscience focuses on interpreting signals from the brain through mobile headsets that gauge our attention and stress levels and receive our mental commands. Good news! When you as an employee are required to take a tedious, one-size-fits-all e-learning training c
