

Turning Hard Times into Good Times

with Jay Taylor

Turning Hard Times into Good Times
Tuesday at 12 Noon Pacific
October 19th 2021: How America's Emerging Revolution is Similar to Cuba's

Richard Maybury and Dr. Roger Moss return. When President Eisenhower was leaving the Presidency, he warned Americans of the emerging "military industrial complex" (MIC) that would destroy our democratic form of government. Sadly, it seems the President was right as a massive bureaucracy now makes rules that have nothing to do with the will of the electorate. A move away from power by the people to power of the government over the electorate to dictate every area of life has provoked growing anger from conservatives. Conservatives crave retention of the Constitution that guarantees the rights

Featured Guests

Richard J. Maybury

Richard J. Maybury is the publisher of U.S. World Early Warning Report for Investors. He has written several entrylevel, common sense books on United States economics, law, and history. His writing style is mostly in an epistolary form, usually as an uncle writing to his nephew, answering questions. Maybury had taught economics in high school. Failing to find a book with a clear explanation of economics, he wrote one himself. Some of his books include Uncle Eric Talks About Personal, Career Financial Security a book that is basically the foundation for his other books about the model perspective Higher Law, Whatever Happened to Penny Candy a book that explains the history of the United Sta

Roger Moss

Roger Moss, President, Director and CEO of Labrador Gold Corp., is an exploration geologist with thirty years experience in Africa, Central and South America, Eastern Europe and Canada in a variety of geological environments. He was instrumental in finding the multi-million ounce Navachab gold deposit in Namibia. In addition to gold exploration in Namibia and Canada, Roger has worked Cu-Pb-Zn exploration in Canada and Mexico, and Cu and Au exploration in Canada, Peru, Colombia and Chile. His extensive research into hydrothermal ore deposits culminated in a Ph.D. in geology from the University of Toronto in 2000. He continues to share his interest and experience in ore deposits and mineral ex
