Autism One: A Conversation of Hope Archives Available

September 1st 2009: Craniosacral therapy helps improve brain function, with Susan Kratz, OTR, CST, and Stephanie Mauck

Susan Kratz, OTR, CST, Director, Special Therapies, and parent Stephanie Mauck will talk with Teri today about craniosacral therapy. What is it? What is the scientific basis undergirding its use to remedy anatomical and physiological malfunctions, and how does this apply in a practical day-to-day sense to improvements in mood, behavior, comfort, and academic success for children with autism? Sue Kratz has 26 years of occupational therapy experience as well as specializing in neurological rehabilitation and pediatrics. She holds specialized certification in sensory integration neurodevelopmental
