February 5th 2010: "Covanta Energy creates clean, renewable energy from trash!"

What happens when a landfill become land "full"? Answer...taxpayers foot the bill to build a new one. It's expensive, and it's a waste of land and other resources that could be used for better things that burying trash. What if I told you that your trash could be converted to clean energy? In fact, that may already be the case in your town. Communities across the U.S. have been using energy-from-waste (EFW) technology for decades. In fact, many states – including Florida and California – have included EFW under the legal definition of renewable energy. Covanta Energy is one of the world's leadin
