**March 29th 2013: Special Encore Presentation:
The Unspoken Language of Men**

Males have been raised to perform and not express emotions. Consequently, their thoughts have gone unheard. "Unspoken Language," is a story of the social, psychological, as well as anthropological history of male behavior, personality and expression of emotion. Trish Forante talks to it's author, Dr. Ron Mercer, co-director of The Center for Creative Living, about how men are governed by ancient predispositions and how it impacts their lives and relationships today.
