### Navigating the Cancer Maze Archives Available

**June 14th 2013: Special Encore Presentation:  
Navigating the Cancer Maze – the Evolution of  
Oncology-What's Changed?**

In this informative episode I focus on the evolution of conventional oncology in my interview with Pioneer Medical Oncologist and Haematologist Prof. Ray Lowenthal AO. His research focuses on leukaemia, lymphoma, bone marrow transplantation and clinical trials of new cancer treatments. An author of over 100 scientific papers; as a pioneer oncologist, Prof Lowenthal undertook postgraduate training 1968-75 in the UK including nearly 3 years at the Medical Research Council's Leukaemia Unit at Hammersmith Hospital, London. Returning to Australia in 1975 he accepted a position at the University of

### Featured Guest

#### Prof Ray Lowenthal

Prof Ray Lowenthal is full time consultant clinical haematologist and medical oncologist at the Royal Hobart Hospital, the major teaching hospital of the School of Medicine. He is also Clinical Professor in the School of Medicine and a Member of the Menzies Research Institute of Tasmania. For nearly 30 years, until 2009, he was Director of the Department of Haematology/Oncology. Prof Lowenthal is responsible, together with other members of the Department of Haematology/Oncology at the RHH, for the care of patients with a wide variety of malignant disorders. Prof Lowenthal has a special interest in management of patients with leukaemia, lymphoma & multiple myeloma. He also has a special inter
