

### The Tech Cat Show Wednesday at 1 PM Pacific

**December 05th 2018: Cryptocurrency and cloud mining with  
New School Mining**

On this week's Tech Cat Show we dig into the exciting world of cryptocurrency with a new twist, crowd mining. We'll chat with Ben and Ava Payne of New School Mining who have created a business that brings the benefits of mining to interested parties without the expense or infrastructure needed. Their New School Mining takes care of the mining for you by providing the equipment you need to more efficiently mine for cryptocurrencies. We'll learn all about how this exciting world works and some trends in cryptocurrency as we blend Crowd and Blockchain efficiencies together. Join us on the Tech

### Featured Guests

#### Ava Payne

Ava Payne has spent her business life focusing on the art of customer experience. She is the Vice President of Public Relations at New School Mining, a NextGen cloud and co-located mining center, which is bringing customer service to the cryptocurrency world. She is a former independent consultant in executive research for numerous corporations in Europe and the United States; As overseer of public relations, media relations and marketing, Ava brings a fresh perspective to the industry that focuses on marrying and fulfilling the needs of customers. This comes through NSM's transparent communication and empowering customers to realize greatest success from their cryptocurrency mining.

#### Ben Payne

New School Mining Founder and CEO Ben Payne is an innovator and leader from the hardware and software fields, and a cryptocurrency miner throughout this decade. Ben's fascination with cryptocurrency started in 2010 when he first heard of Bitcoin. This passion led to building Bitcoin miners back when GPUs could still be used profitably. He also purchased some of the first ASIC miners from Butterfly Labs and KNC. In 2017, he started developing a strategy for building a truly scalable GPU mining operation. Using his strong engineering skills, he developed a unique end-to-end system design that would be one of the most efficient and scalable systems in the world. The result was the crea
