Tuesday at 10 AM Pacific
February 19th 2019: Use of Visible Light for Continuous Environmental Disinfection

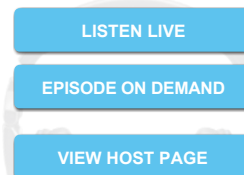

Join us with our guest Dr. Cliff Yahnke, Ph.D. as we discuss the problem - Current environmental disinfection methods are applied at discrete moments in time (ie. episodically). The results of achieving a "clean room" are short-lived as harmful bacteria re-populate the space. The Solution - Indigo-Clean offers a solution that continuously disinfects the environment and bolsters your current infection prevention efforts. And the Clinical / Laboratory Evidence and data on informational documents and research findings that either report directly on the effectiveness of the Indigo-Clean technology

Featured Guest

Cliff Yahnke, Ph.D.

Dr. Yahnke received his B.S. in Engineering Physics from the Illinois Institute of Technology and his Ph.D. in Physics from Northwestern University. He joined Kenall in 2013 bringing over 24 years of photonics and healthcare experience in a range of fields related to defense, telecommunications, radiation oncology, medical imaging, analytical instruments, and surgical lighting to Kenall. As one of the inventors of Indigo-Clean, Dr. Yahnke has led its development and introduction into healthcare facilities across the US. Widely regarded as the industry expert on visible light disinfection, he has authored numerous articles on it and led numerous studies using Indigo-Clean demonstrating its
