What do we know about Nuclear Power? Are we recycling nuclear waste? What is the US or the World's major countries doing today to advance nuclear power? These are key questions as the nuclear industry begins to reassert itself in the power consumption debate in the US. But one fact has avoided all of us, how is nuclear waste recycled? Is recycling a must to continue to produce nuclear power? Our guest today, are Mr. Steven Curtis and Mr. Tom Dolan, leading advocates to recycling nuclear waste safely. Joins us at T3, as we discuss and review the most dynamic challenges to nuclear
