The LA chapter of the U.S. Green Building Council has an innovative program that helps early-stage companies with the technology to support a net positive future. Companies accepted into the Net Zero Accelerator work with industry experts to learn how to find their ideal customers and close deals. Some of the priority areas are building decarbonization, occupant wellness and sustainable infrastructure. Today we'll talk with the Director of Net Zero Accelerator, Colin Mangham, and representatives from companies who have participated in the program.

Featured Guests

Colin Mangham

Colin creates and communicates the value of new and important ideas, initiatives, and organizations. He's guided the birth, growth, and rebirth of global brands (generating over \$500 million in revenues) and hundreds of entrepreneurs (securing over \$75 million in funding). As Director of the Net Zero Accelerator, a program of the U.S. Green Building Council's Los Angeles Chapter, he leverages his entrepreneurial experience in speeding the commercialization of cleantech innovation. Concurrently, in his role as Chief Marketing Officer, he guides how Morpho Energy is accelerating the transition to the electrified economy. Colin earned his MBA from Liverpool but spent half of his undergrad at LS

Andrew Crawford

With a fiery entrepreneurial spirit and a passion for disruptive innovation, Andrew has been on the front lines in the development of vertical farms, living walls, electric vehicles, water filtration, waste management, and alternative energy solutions. From 2005 to 2016, Andrew spent 11 years living in the Hawaiian Islands where he owned and operated a hospitality consultancy group, raised his family, and was the owner/operator of an orchid nursery. He possesses a strong background in economics and hospitality management which has served him well over the past 20 years as a hotel manager and consultant working with such brands as The Four Seasons, Hilton, Starwood, and Ritz Carlton. He has a

Hank Touch

As VP of Enterprise at Wynd Technologies, Hank leads the development of IAQ initiatives and adoption in commercial real estate including office, education, multi-family, and hospitality. He also spearheads the development of new products and innovative features that shape the future of indoor air quality and how owners, occupants, and employees interact with their spaces. A graduate of MIT, Hank brings to Wynd his expertise from data analysis and medical physics. He is a business leader by profession and medical physicist by training. He likes to tackle business questions one data analysis at a time, and as a data nerd who is passionate about improving healthcare with AI, low cost bio-sensor
