Our guest on Wednesday October 27th at 1PM EDT / 10 AM Pacific Time on [www.voiceamerica.com](http://www.voiceamerica.com) will be Italian-born, world-renowned artist Remo Saraceni, who is best known for inventing the Walking Piano that became a hallmark in the major motion picture Big, starring Tom Hanks. However, the Walking Piano is just one of Remo's many interactive creations that connect the imagination of childhood with the technology of the future. Remo will talk about the marvels and wonders of technology that he initiated back in the 70s that have now become part of everyday modern life, including energy saving

**Remo Saraceni**

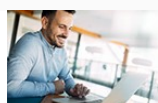

Remo Saraceni, also known as a "high-tech Renaissance Man", has credentials that also include works on display in science and art museums, discovery centers, and children's hospitals throughout the world. Remo's Cloud Light Sculptures are in the collections of major museums and featured in the Whitney Museums collection "High Styles: 100 years of American Design." Currently, they're updated for the 21st century. The Musical Cloud® is a revolution in design, merging light, sound and sculpture in a single form.
