

Autism One: A Conversation of Hope Archives Available
June 02nd 2009: Reaching Sensory Processing Disorders with Dr. Charles Chapple

So frequently, sensory processing disorders, including those in ADHD and autism, are addressed through a variety of behavioral and biochemical approaches; this can result in the significance of the biomechanical aspects of these conditions being underestimated. Experts state that if a cluster of irregular nervous system reflexes remain unaddressed they will prevent "sustained long term improvement." Teri and chiropractor Charles Chapple will discuss the nervous system with its biomechanical relationships to the spine and cranium and the noninvasive approaches of chiropractic and craniosacral
