July 15th 2009: NE Rivers, Dams, Salmon and What You Otter Know

Save the Smell! Wiscasset Maine, Don Hudson is working to restore 10.6 sq mi Montsweag Brook watershed, a tributary of the Sheepscot River. The brook's estuary flows by Chewonki. They've got two dams to take out to restore fish passage without compromising CMP's mitigation plan. Tune in for how this is being remediated and rescued. Discover Global Warming's consequences for rivers of the Northeast. Piotr Parasiewicz will share observations and insights into the effects of global warming on the Lamprey River in NH, Wekepeke Brook, the Fort, Deerfield and Westfield Rivers in MA, the Saugatuck a
