**June 02nd 2010: Can your thoughts change your genes?**

Get ready to challenge everything you've ever heard or been taught about your genetic destiny. Find out about the incredible interaction between your mind and body and the processes by which your cells communicate. World renowned research scientist, former professor and bestselling author, Dr. Bruce Lipton will discuss the link between mind and matter and show us how human beings can control gene activity and even rewrite their genes by focusing on their beliefs. Welcome to the new biology – the biology of belief!

### Featured Guest

#### Bruce H. Lipton, PhD

Bruce H. Lipton, PhD is an internationally recognized leader in bridging science and spirit. Stem cell biologist, bestselling author of *The Biology of Belief* and recipient of the 2009 Goi Peace Award, he has been a guest speaker on hundreds of TV and radio shows, as well as keynote presenter for national and international conferences, taking his award-winning medical school lectures to the public. He lectures to conventional and complementary medical professionals and lay audiences about leading-edge science and how it dovetails with mind-body medicine and spiritual principles. He is regarded as one of the leading voices of the new biology. His deepened understanding of cell biology highligh
