August 10th 2010: Advice about the advice that's given to family caregivers

Dr Dave Travland, a clinical psychologist, leads the Caregiver Survival Institute. Bruce Ritchie is Moderator & CEO of the Fetal Alcohol Disorders Society. They both have powerful experience as family caregivers especially in the care of children with serious challenges. In their work, they support family caregivers facing a wide range of challenges. They discuss the challenges they personally experienced. They describe how their own experiences guide them in providing advice. They talk about advice that's most useful to family caregivers, and suggest ways for family caregivers to recognize us

Featured Guest

David A. Travland

David A. Travland holds a Ph.D. in Clinical Psychology from the University of Iowa with a clinical internship at Yale University. He served as Assistant Professor of Psychology at Wake Forest University in the late 1960s. He operated his private clinical practice in North Carolina for thirty years in addition to serving as an organizational development management consultant for dozens of companies throughout the nation. Much of his consulting took the form of sales training, management training and personnel selection using personality tests. He's a former caregiver and Executive Director of the Caregiver Survival Institute, Inc., a non-profit social services agency. He is co-author, along w
