September 29th 2010: Can IT prevent implosion across the energy value chain?

While most of us advocate energy efficiency and sustainability, it comes with a price tag. For one thing, links in the energy value chain such as production, delivery, and retail, are all facing their own challenges related to an aging workforce, infrastructure, and technology. Additionally, the competitive pressures that are driving down costs, may force suppliers to cut corners. How can IT across the energy value chain, work to prevent an implosion?
