Robert Prechter has written 13 books on finance, beginning with Elliott Wave Principle in 1978, which predicted a 1920s-style stock market boom. Ian will explain why polices geared to stimulating the economy will not only fail but will plunge us even deeper into a price collapsing depression. Ian will explain why he is betting on deflation, not inflation and why, in this environment, gold mining will be a portfolio savior as it was during the Great Depression when the Dow to g

#### Bob Hoye

With a degree in geophysics and a number of fascinating summers in mining exploration, one winter in "the bush" quickly led Bob into the financial markets. Bob's review of financial history provided the forecasting models designed to anticipate significant trend reversals in the sometimes alarming volatility typical of the transition from rampant speculation in tangible assets to fabulous speculation in financial assets. In anticipation of the latter opportunity, a monthly publication for financial institutions was started in Ja
