January 26th 2011: A Compromised Generation: The Epidemic of Chronic Illness in America's Children

Children are being diagnosed with illnesses such as autism, asthma, allergies, and ADHD at a breathtaking rate. Have you ever wondered if there is clear and concrete evidence that environmental factors may lead to the epidemic of these illnesses? Did you know that that the factors that cause autism in one child are the same factors that cause asthma in another, or celiac disease in a third? Today's guest says that although the specific pathophysiology of each individual child's illness varies, they all have the same basic underlying causes. Today's guest, Beth Lambert will provide details on
