April 05th 2011: Information Technology for Family Caregivers

Terry D'Silva is an electronic engineer, inventor and businessman and founder of TerteC Enterprises Inc, a successful international technology company. His latest invention, Mon Ami, could widely impact society by improving the quality of life for seniors, people with handicaps and their family caregivers, and to provide a platform for active aging. He describes his own family's experience with health-related challenges and the role of family caregiving in his family life. He talks about the technology solutions, including Mon Ami, he developed to meet these needs. He explains how his family's

#### Terry D'Silva

Terry D'Silva is an entrepreneur, electronic engineer, inventor and businessman and holds a Masters Degree in Electrical and Electronic Engineering. In 1984, he founded TerteC Enterprises Inc., to realize and market his ideas, inventions and innovations, and to hold the patents for some of his inventions. With its mission "Engineering our tomorrows", TerteC has established itself as a design house with an international reputation. Its electronic products can be found in countries ranging from North America to China and Europe. In its local community, TerteC works with local high schools, colleges and universities to introduce students to topics such as electronics, robotics, computer enginee
