**October 12th 2011: Atlantic Menhaden Overfished and a New Documentary Film: Shored Up**

Jud Crawford, Ph.D. of the Pew Environment Group introduces a plankton-eating fish that is forage food for fish, birds and marine mammals. The Atlantic menhaden have been called the most valuable fish in the sea. The ecology of menhaden is described and a new initiative to restore menhaden by increasing the number left in the ocean and for finally taking into account the needs of menhaden predators. And so Castles Made of Sand Fall into the Sea, eventually... (Jimi Hendrix) Ben Kalina introduces his new documentary film, Shored UP. Ben experiences life on a barrier beach by spending a hurr
