December 27th 2011: Viewing the home with information technology

Alan Majer is the founder of GoodRobot.com. This uses technology to help elderly people live independently in their homes by sharing information with family caregivers. He explains how the technology works in the home. He discusses the types of challenges faced by family caregivers and the family members they care for and says how GoodRobot helps overcome these. He explains the challenges created for family caregivers and family members by technologies like GoodRobot and says what the solutions are. He says what more he would like to see done to bring more helpful technology to family caregiver

Featured Guest

Alan Majer

Alan Majer is the founder of Good Robot. He has always been interested in how science, technology, and society intersect to shape our future. Over the last 12 years, he has pursued this interest directly in his career as senior analyst and writer – interviewing hundreds of startup companies to identify cutting edge technologies and businesses. Now he is exploring these frontiers hands-on: transforming care for seniors with the use of sensors and home automation. His current venture uses technology to help elderly people live independently in their homes by making homes safer (with products like Stove Reminder, www.StoveReminder.com, and connecting family a
