### Go Green Radio Friday at 9 AM Pacific

**January 20th 2012: Despite the Solyndra Fiasco, Investment in Renewable Energy is Vital**

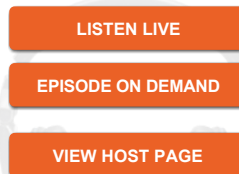

It doesn't take a rocket scientist to know that the U.S. desperately needs clean, affordable energy. But maybe it takes a nuclear physicist who founded an investment banking firm to help the government make better choices about where to invest public dollars to help speed the development of renewable energy. Today's guest on Go Green Radio is Dr. Michael Gamble, a formerly on staff in the physics division of the Los Alamos National Laboratory, where he researched devices such as terawatt laser systems, and is now a founding partner of a California investment banking and corporate advisory firm

### Featured Guest

#### Michael T. Gamble

Dr. Gamble is a former staff member of the physics division of the Los Alamos National Laboratory, where he researched directed-energy devices such as terawatt laser systems. He is a former Vice President of Manufacturing Technology for Nanovation Technologies, Inc. and a founding partner of Fidelys, LLC, a California investment banking and corporate advisory firm. Gamble holds degrees in nuclear and mechanical engineering, and was a postdoctoral fellow at the Massachusetts Institute of Technology.
