February 15th 2012: America's Most Mysterious Monument with Raymond Wiley

The Georgia Guidestones are a collection of standing stones near Elberton, Georgia. Built in 1980, they are primarily composed of six slabs of granite: one central pillar, four "major" stones that fan out from the center, and a capstone. The capstone has engravings on all four of its sides in four different ancient languages, all of which read, "Let these be guidestones to an Age of Reason." Those guidelines have proven extremely controversial, causing speculation and rumors of conspiracy that go far beyond north-east Georgia. Raymond Wiley will discuss his findings and research on the show.
