March 20th 2012: Walking through doorways--
how forgetting works normally

Dr Gabriel Radvansky is an author of "Walking through doorways - how forgetting works normally", a title which he explains. He's Professor in the Department of Psychology, University of Notre Dame, IN. He describes the questions his research would answer and the answers he got. He explains his conclusions about the ways forgetting normally works. He says why the brain normally forgets things and explains why this forgetting is not only normal, but also useful. He says young and older adults forget in the same way and that older adults' memory function may be as good as that of young adults. He
