

**Family Caregivers Unite!
Archives Available
July 31st 2012: Home Automation and
Cybercrime**

Alan Majer is the founder of GoodRobot.com. John Wunderlich is an independent information and privacy consultant in Toronto. Alan explains how home automation benefits family caregivers caring for family members with health challenges. John explains cybercrime risks of most concern to family caregivers caring for family members with health challenges. They discuss trends in home automation and cybercrime, the links between the two, and how these might harm family members whom family caregivers are caring for. Alan highlights questions about risks of cybercrime that family caregivers should ask
