What if all things were possible with knowledge of how to re-work your brain into its full capacity? On the cutting edge of neuropsychiatry and neurology, Dr. Bruce Price shares with us how our “malleable” our brain really is and what that means for transforming our behaviors and our lives. A Harvard University graduate and an Associate Professor of Neurology at both Mass General Hospital and Harvard Medical School, this neuroscience heavy-hitter will guide us into one of science’s most important and cutting edge frontiers today. If you want to know how to improve your life starting with your

Featured Guest

Dr. Bruce H. Price

Dr. Bruce H. Price graduated from Harvard University cum laude, attended the University of Cincinnati College of Medicine, then completed an affiliated internal medicine residency program, serving as its chief resident. He next trained in general neurology at the University of Colorado Health Sciences Center in Denver, and returned to Boston where he completed fellowship training in cognitive and behavioral neurology at Beth Israel Hospital; he served there as a staff member for ten years. In 1994, Bruce was appointed Chief of the Department of Neurology at McLean Hospital. He is an Associate in Neurology at Mass General Hospital and Associate Professor of Neurology at Harvard Medical School
