January 7th 2013: See Me Not My Disease—
What Family Caregivers Should Know About
Alzheimer's disease Stigma

Mary Schulz is Director, Information, Support Services and Education at the Alzheimer Society of Canada, www.alzheimer.ca. She talks about her career, own experience with family caregiving and what led to her interest in family caregivers caring for family members with Alzheimer's disease. She explains her help for family caregivers caring for family members with Alzheimer's disease. She describes the Society's programs for combating stigma in Alzheimer's disease. She identifies stigma-related challenges their consequences, including those arising in the healthcare and social-services systems,

Featured Guest

Mary Schulz

Mary Schulz has been the Director, Information, Support Services and Education at the Alzheimer Society of Canada since 2006. She has spent her career in healthcare, providing individual and family counseling to clients facing crises associated with life-limiting illness, chronic disability and cognitive impairment. She has also helped to plan and implement programs and services in settings throughout the health-care continuum. She obtained her Bachelor degree in Social Work from Ryerson University and holds a Masters degree in Social Work from York University. In her current role, Mary, along with her counterparts across provincial Alzheimer Societies, is leading the Society's Culture Cha
