Dr. Anna Reid, President, 2012–2013, of the Canadian Medical Association <http://www.cma.ca/>, explains the path that led her to acclamation as President and her role in the position. She highlights medical conditions for which family physicians and family caregivers need to closely communicate. She says how family physicians as a profession view family caregiving and explains concerns they may have in working closely with family caregivers. She summarizes the Association's positions, policies and priorities for family physicians and family caregiving. She discusses family caregivers in the role
