**February 21st 2013: Special Encore Presentation: Help
Dolphins, Do Not Over-Fertilize, It Flows to the Sea!**

The dolphins of Florida's Indian River Lagoon were dying at such an alarming rate that the situation was declared a "marine mammal unusual mortality event." Most distressing is to see dolphins covered with skin-eating fungal infections. To save the dolphins, we must lessen the phosphorus and nitrogen entering the ecosystem. Rob talks with Stephen McCulloch, Founder/Manager of Marine Mammal Research and Conservation Program, Harbor Branch Oceanographic Institute, Florida Atlantic University at Fort Pierce. Steve rescued dolphins, manatees, and even Arctic seals in Florida. Since 1999 more than
