May 15th 2013: The College Degree Lie: Does A College Degree Still Matter in the Digital Age?

The higher education sector is becoming radically different in the digital age. A college degree used to be a passport to success and job security. Now, the college degree is becoming a commodity. There are both traditional universities and for-profit universities everywhere and ready to meet your needs. Universities are doing market research and are catering to a different market segments (non-traditional, traditional and etc). Higher education is all around us. Access to higher education and knowledge are no longer just for the chosen few. Has the college degree become a commodity? Is an
