Moir's Environmental Dialogues Archives Available

June 13th 2013: Saving the Nation's Oceans and the Big Clathrate Gun Firing Methane Gas.

Richard Charter a senior fellow at the Ocean Foundation talks with Rob. A House Committee passed yesterday a measure to boost oil production off of California and leases for drilling off of the U.S. Southeast. Known for protecting CA shores, Richard also raises concerns for living in Virginia, New England, and the NW. He calls for expanding National Marine Sanctuaries. Methane gas hydrate is gas locked in an ice-like lattice of water molecules. There's more of it to be had than natural gas. Extraction is very risky as there is evidence that a great release of gas hydrates, called the clat
