July 19th 2013: Biologist and Stem Cell Researcher Bruce Lipton Explains the Science Behind the Mind-Body Connection

Bruce Lipton's research at Stanford University's School of Medicine revealed that the environment, operating through the membrane, controlled the behavior & physiology of the cell, turning genes on & off. His discoveries, which ran counter to the established scientific view that life is controlled by the genes, presaged one of today's most important fields of study, epigenetics. Two major scientific publications derived from these studies defined the molecular pathways connecting the mind & body. Dr. Lipton will be talking about his new book, The Honeymoon Effect. Listen in as Alison will be h
