Breaking Banks Fintech
Thursday at 12 Noon Pacific
September 19th 2013: Neither Phish nor fowl...

Mobile phones are the most popular way that we access the internet and web services that we rely on every day. In a world where greater mobility and transparency are the norm, there is tremendous risk of security breaches which can interfere with the utility and friendliness of our tablets and smartphones. Viruses can infect the systems, exposing user's sensitive information. This is of special concern to the financial industry, where consumers are demanding mobility, and banks are wondering how to make these mobile places safe. Today on Breaking Bank\$, we are looking at the different

Featured Guests

Samy Kamkar

Samy Kamkar is a privacy and security researcher, computer hacker, whistleblower and entrepreneur. At the age of 17, he co-founded Fonnality, a unified communications company, which raised over \$24 million in private funding. He is possibly best known for creating the Evercookie and the MySpace worm Samy (XSS), as well as his discovery of illicit mobile phone tracking where the Apple iPhone, Google Android and Microsoft Windows Phone mobile devices transmit GPS and Wi-Fi information to their parent companies. His research led to a series of class-action lawsuits against the companies and a privacy hearing on Capitol Hill. His newest venture is Unleak, a Los Angeles based web security solutio
