December 17th 2013: In-Memory Computing

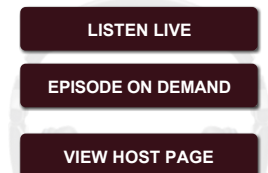

Today's buzz: In-memory. Today, your recipe for a truly intelligent business requires a magic ingredient: data. Lots of it. But even if you've captured the best and fastest data in the world, you still need the right information culture to make use of it whenever, wherever, however you need it. Good news: Now, in-memory technology allows you to store that information in a flexible, fast-to-access, and affordable way. Ah, can the sweet taste of success be far off? The experts speak: Mike D'Urso, Deloitte: "Keep it as simple as possible but no simpler". When it comes to Information Technolo
