February 28th 2014: Let it Shine: The 6000 Year Story of Solar Energy

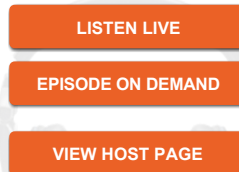

"Western man has been using the sun's rays for useful purposes since the days of ancient China, as this comprehensive, carefully researched, clearly written history of solar architecture and technology makes abundantly clear," says The New York Times about John Perlin's book, Let it Shine: The 6000-Year Story of Solar Energy. Let it Shine presents the step-by-step development of solar architecture and technology and pertinent energy policies. By providing the background for today's vibrant solar industry, a deeper understanding emerges of how solar energy applications have evolved and performe

### Featured Guest

#### John Perlin

John Perlin is an historian and the author of three highly acclaimed environmental books. Amory Lovins writes that Golden Thread: 2500 Years of Solar Architecture and Technology (with Ken Butti) is "rich with surprises on every page." Perlin's A Forest Journey: The Story of Wood and Civilization was described by the BBC as "one of those bold imaginative steps through history that leaves you full of excitement as suddenly events fall into a pattern for the first time." And his most recent book, From Space to Earth: The Story of Solar Electricity (Harvard University Press), was called "vivid and fascinating" by Nature Magazine. Perlin has spoken to a wide range of audiences in the United
