**June 13th 2014: Understanding Pharmaceutical Compounding in Palliative Care**

Join the conversation as we learn more about how pharmaceutical compounding can be used in pain management for older adults. Listen as we delve into the benefits of individualizing medications. Explore these topics and more with our guest, a pharmacist specializing in compounding. What does pharmaceutical compounding mean and how does it work? What is palliative care? How can pharmaceutical compounding and palliative care work together to ease pain and suffering for older adult patients? Our guest has over 25 years of compounding experience to share with us. We will discuss the methods

### Featured Guest

#### Emily Lynch

Emily Lynch graduated from West Virginia University School of Pharmacy in 1988, where she received extensive training in both the science and art of pharmaceutical compounding. She has since practiced in a variety of settings including hospital, chain and independent retail, and free clinic. Currently Emily is a staff pharmacist with Integrated Pharmacy Network in Midland, Michigan in the long-term care division and primary pharmacist for the compounding division.
