November 07th 2014: Ibogaine and Ibogaine University - Live From Rosarito, Mexico

In this show I travel to Ibogaine University in Rosarito, Mexico to learn about Ibogaine, an isolated active alkaloid from the root bark of the central West African shrub Tabernanthe Iboga. Ibogaine has been used for thousands of years for spiritual development and as a rite of passage into adulthood. In the 1960's, it was found that ibogaine can be used to stop painful opiate withdrawal and other chemical addictions, yet it still remains a schedule I substance in the United States. In this show we will talk about what ibogaine is, how it works to stop addiction, and why it is illegal in th

#### Charles Johnston

I was born in a rural mountain town in North Carolina. At an early age I had a penchant for being adventurous and sometimes reckless. These traits seem to be both good and bad depending on the situation but nonetheless it led to a great curiosity for life experience. Into my adult years I began to shed some of the more rigid paradigms I was raised with and began to move around the country and experiment with different substances. Eventually, while living in Los Angeles and about to begin my studies at UCLA I quite innocently got involved with opiates in an attempt to understand the supposed appeal. This journey into the hardest of drugs, that being Heroin, combined with naivety and curi

#### Dr. Carlos Silva

Dr. Carlos Silva is the chief medical doctor and operates the day to day function and treatment of the patients at Ibogaine University. He has been carefully screening and treating Ibogaine patients for over 4 years and has treated over 600 patients with Ibogaine without any negative impacts on health. Dr. Silva graduated from the University of Baja California. He then went on to work at Tijuana General Hospital and specialized in internal medicine. After that, he went on to work as Chief of Internal Medicine at Rosarito General Hospital, where he has been for the past 3 years. Ibogaine treatment has always been a passion for Dr. Silva. He has helped to save many individuals from the
