December 15th 2014: That Sustainability Thing: Learning from the past

For some, the sustainability movement is something relatively new. They associate it with clean technology, new solar panel technologies and modern wind farms. And, of course, the relatively new science of climate change and the green movement... For others, they recognize that ancient civilizations and cultures have long practiced sustainability and have a tradition of building low energy building that, for example, took advantage of prevailing winds to cool those buildings. In essence, these civilizations drew on the lessons of their past. This is a lesson we should heed. Our guest, Steve Bu

Featured Guest

Steve Burrows

Steve Burrows is an Executive Vice President and the USA Director of Buildings at WSP, a leading global engineering firm. Prior to WSP, Burrows held senior positions at AECOM and Arup. He has lead the engineering of projects including Apple's new headquarters, the Beijing Olympic Stadium (Birdsnest), Stanford's Graduate School of Business, and the Manchester Stadium. Burrows is a Commander of the Order of the British Empire (CBE), and hosts a television program on the engineering of ancient structures.
