Internet of Things with Game Changers,
Presented by SAP
Tuesday at 7 AM Pacific /10 AM Eastern
December 17th 2014: **Big Data and the Internet of Things - Part 2**

Tune in

Tuesday at 7 AM Pacific
Time/10 AM Eastern Time on
VoiceAmerica Business
Channel

The buzz: Data! The Internet of Things (IoT) is a vast ecosystem of physical objects connected to the Internet, offering the potential of big opportunities to transform your business. When we break it down, the IoT is nothing more than millions – perhaps even trillions – of objects, devices, and sensors, each generating its own continuous stream of data. Put these all together and you have the ultimate Big Data challenge. What actually happens at the intersection of Big Data and the Internet of Things? And how do we now balance past data and real-time data? The experts speak. David Stephen

Featured Guests

W. David Stephenson

W. David Stephenson, principal of Stephenson Strategies, is an Internet of Things (IoT) consultant, thought leader and journalist. He particularly focuses on a paradigm shift to “circular companies,” away from traditional hierarchies and linear processes, to a new model in which everyone — supply chain, manufacturing, product design, marketing, distribution networks, and perhaps even customers — is united in a continuous cycle with shared, real-time IoT data as the hub; and “SmartAging,” using a combination of wearable devices and smart home devices to allow seniors to “age in place” with dignity, improved health, and lower expenses. He wrote *The Future Is Smart* (HarperCollins Leadership imp
