Imagine if human development had only positive impact on the planet. This is the objective of The Living Future Institute. A proactive means towards meeting this objective is by building according to The Living Building Challenge. The Living Building Challenge is the ultimate standard to achieve with regard to sustainable architecture. The standard uses the simple analogy of a flower, "a building informed by its bio region's characteristics, that generates all of its own energy with renewable resources, captures and treats all of its water, and that operates efficiently and for maximum
