My guest on Navigating the cancer Maze this week is Prof Dr. Jérôme Galon, Research Director at INSERM (National Institute of Health and Medical Research) & leader of the INSERM Integrative Cancer Immunology laboratory, at the Cordeliers Research Centre. His current interests & major contributions concern basic & translational research in cancer immunology, using systems biology. His laboratory has made some ground-breaking findings demonstrating that the adaptive immune response within a tumor was a better predictor of survival than traditional staging based on the size and spread of a tumor
