Family Caregivers Unite! Archives Available

April 28th 2015: Tiny Tubes for Treating Strokes Explained for Family Caregivers

Dr. Michael Hill, Professor for the Departments of Clinical Neurosciences, Community Health Sciences, Medicine and Radiology at the University of Calgary, is Director of the Stroke Unit for the Calgary Stroke Program. He highlights the research into acute ischemic stroke he and his research team are conducting, and what the "tiny tubes" are. He explains how the research is organized and conducted, how stroke patients are included, and how the research is described to them and their family caregivers. He explains why the key findings are so important in the emergency treatment of acute ischemic

Dr. Michael Hill

Dr. Michael Hill, Professor for the Departments of Clinical Neurosciences, Community Health Sciences, Medicine and Radiology at the University of Calgary, is Director of the Stroke Unit for the Calgary Stroke Program, Alberta Health Services. He holds McGill University's BSc in biochemistry and the University of Ottawa's MD degree. He's certified as a specialist in Internal Medicine and in Neurology. He undertook a stroke fellowship and clinical epidemiology training at the University of Calgary, where he completed his MSc and where he was appointed to faculty in 2001. He is currently Director of the Stroke Unit at the Foothills Medical Centre, Calgary Health Region. His research includes
