The buzz: Is faster 'smarter'? You don't need to be a statistician to access sophisticated analytics online and run them incredibly fast. But despite the powerful tools available to all companies, many organizations still spend too much time gathering data and too little analyzing and interpreting it. Will disseminating the tools to all company levels enable superior decisions? Is data quality still a challenge? Are your board's requests for analytics giving them too many choices that slow them down? The experts speak. Derek Loranca, Aetna: "Any time scientists disagree, it's because we have i
